

## **7th Annual FACES of PAD**

Exploring the Role of Ultrasound in Vascular Surgery: From Diagnosis to Treatment  
11/14/2023 - 8:00am - 5:00pm

Session1: Utilizing Ultrasound in the Evaluation of the PAD Patient  
Cultivating Physical Wellbeing  
Treatment Outcomes in the CLI Patient Based on Duplex Ultrasound Findings  
CLI Case Study  
PANEL DISCUSSION with QUESTIONS

Session 2: Carotid Artery Disease: Evaluation  
Role of Ultrasound in Grading Carotid Artery Stenosis  
Review of Diagnostic Criteria vs. the Gold Standard for Correlation  
Interesting Carotid Case Study  
PANEL DISCUSSION with QUESTIONS

Session 3: Treatment Options for the Chronic Venous Insufficiency Patient  
The Critical Role of Vascular Ultrasound in the Work-Up of Vein Disease  
Valvular vs. Obstructive Disease in the Setting of Chronic Venous Insufficiency (CVI)  
Panel DISCUSSION with QUESTIONS

LIVE CASE: Dr. LeSar - Operator | Dr. Harris - Moderator

Session 4: Ultrasound in Abdominal Aortic Aneurysm Diagnosis and Treatment Options  
Imaging Protocols and Diagnostic Criteria  
Ultrasound Tips and Tricks to Overcoming Pitfalls  
Treatment Options  
Case Study

Session 5: Advances in Technology and Future Directions in Vascular Surgery  
Ultrasound Role in Diagnosing Deep Vein Insufficiency and Treatment Options on the Horizon  
Ultrasound Role in Dialysis Vein Mapping and New Endovascular Options

BreakOut Sessions to Run Concurrently  
Pelvic Vein Evaluation - Canon  
Tibial Mapping and PATs - GE

## 7th Annual FACES of PAD

Our Vascular Health can determine the length + quality of our lives. We are as old as our arteries

Vascular - 11/15/2023 - 8:00am - 4:45pm

Session1: Wellness and Aging: Understanding the Impact of Hormones, Supplements, Diet and Exercise on the Body

The Role of Hormones in Aging

The Benefits and Risks of Supplements in Aging

Diet and Nutrition for a Healthy Aging Body

Exercise and Physical Activity Across the Lifespan

PANEL DISCUSSION with QUESTIONS

Session 2: Understanding Peripheral Arterial Disease (PAD)

Recognizing the Signs and Symptoms of PAD

Risk Factors and Their Impact on PAD Development

Outcomes and Complications of PAD

Managing PAD: Treatment and Lifestyle Modifications

LIVE CASE PRESENTED By TERUMO MEDICAL - The Role of Stenting: Dr. Cuozzo - Operator | Dr. LeSar - Moderator

Session 3: Venous Issues, Varicose Veins and Disease from a Woman's Perspective

Chronic Venous Insufficiency (CVI)

Deep Vein Thrombosis (DVT)

May Thurner Syndrome (MTS)

Pelvic Congestion Syndrome (PCS)

PANEL DISCUSSION with QUESTIONS

Session 4: Complex Medical Vascular Issues

Renal Vascular Hypertension: When to Stent?

Impact of Pre-Existing Conditions on Renal Vascular Disease

Gender Differences in Treatment and Outcomes for PAD + Vascular Disease

Current Standard of Care for Dialysis Access vs. New Technology

LIVE CASE PRESENTED By BD - The Role of Atherectomy - Rotarex: Dr. Harris - Operator | Dr. Cuozzo - Moderator

Session 5: Acute Cardiovascular Issues

Acute Stroke

Acute Pulmonary Embolism

Acute MI

Acute Limb Ischemia

PANEL DISCUSSION with QUESTIONS

Session 6: Carotid Disease issues from a Woman's Perspective

Carotid Artery Interventions

TIA Workup

Mesenteric Vascular Disorder

Median Arcuate Ligament Syndrome: A Combined Approach

PANEL DISCUSSION with QUESTIONS

Session 7: Aneurysm Disease Issues and Management

Abdominal Aortic Aneurysm

Neurogenic Claudication - Leg Pain: Chiropractic Approach

Neurogenic Claudication - Leg Pain: When to Operate

Peripheral Artery Aneurysm

PANEL DISCUSSION with QUESTIONS

Session 8: Wound Healing + Limb Salvage Issues

Diabetic Foot Ulcers

Critical Limb Ischemia and the Role of HBO  
Venous Ulcers and the Role of Wound Centers + How Primary Care can Help  
Pressure Ulcers - Biomechanical Problems  
PANEL DISCUSSION with QUESTIONS

Session 9: Closing Session: How Early Intervention, Collaboration, Adoption of Innovative Technologies and Effective  
PANEL DISCUSSION with QUESTIONS

# FACES 2024

## *After Hours Activities*

### Wednesday Evening - 6pm - 8pm

#### **"Innovative Ultrasound Solutions: A Hands-On Learning Experience with GE"**

*Thank you GE Medical Imaging*

Attendees of the "Innovative Ultrasound Solutions: A Hands-On Learning Experience with GE" will have the unique opportunity to explore the latest advancements in ultrasound technology through interactive, hands-on demonstrations. This workshop will provide in-depth training on cutting-edge GE ultrasound systems, equipping participants with practical skills to enhance diagnostic accuracy and efficiency. Attendees will gain insights into new features, techniques, and applications, enabling them to stay at the forefront of medical imaging and deliver improved patient outcomes in their clinical practice.

### Thursday Evening Welcome Reception - 530pm - 630pm

*Thank you Canon Ultrasound Division*

Attendees of the Welcome Reception with Canon Ultrasound will enjoy a unique blend of networking opportunities and exposure to the latest advancements in ultrasound technology. This reception provides an informal setting to connect with industry experts, peers, and thought leaders, fostering valuable relationships. Participants will also hear firsthand about Canon's newest innovations in ultrasound, gaining insights into cutting-edge features and future trends that can elevate diagnostic capabilities. It's a perfect opportunity to learn, connect, and stay ahead in the rapidly evolving world of medical imaging.

### Thursday Evening Educational Dinner - 630pm - 830pm

#### **"Modern Insights into Atherectomy and Chronic Venous Disease in Women"**

*Thank you Medtronic Peripheral Vascular Division*

**\*2 AMA PRA Cat 1 Credits Available for this event**

Attendees of the Educational Dinner on Atherectomy Usage and Women's Chronic Venous Issues will gain valuable insights into the latest advancements and best practices for use of atherectomy and managing complex venous conditions in women. This in-depth session, led by experts in vascular care, will explore the proper role of atherectomy in treating vascular conditions and a special focus on the unique vascular challenges women face. Participants will learn about tailored treatment strategies, engage in discussions on optimizing patient outcomes, and enjoy networking opportunities with fellow professionals, all while deepening their understanding of cutting-edge vascular solutions.
